Anglican Church Annual Meeting

The annual meeting of St. Cyprian's Anglican Church was held at the home of Mr. and Mrs. Booker on Wednesday evening last, with Rev. A. D. Currie in the chair.

The financial report was read and approved. The Women's Auxiliary and Sunday School reports were also read. A vote of thanks was tendered to the ladies of the W. A. for their excellent work during the year and Mrs. Booker was also thanked for her work in conducting the Sunday school.

Mr. H. D. Barker was appointed rector's warden and Mr. J. D. Thomas was re-elected people's warden. Mrs. Lowrie, Mrs. Pratt and Messrs. E. K. Pratt, R. Barrett, J. E. Gooder, J. Rupp and W. R. Hartley were elected to the vestry.

Mr. H. D. Barker was appointed delegate to the Synod to be held at Calgary in February.

Prior to the church meeting the annual meeting of the Women's Auxiliary was held. The financial report showed that the year had been very successful and that it had been possible to make very substantial donations to the church fund.

Mrs. E. K. Pratt was elected President for the ensuing year; Mrs. Booker, Vice-President; and Mrs. Lowrie, Secretary-Treasurer.

Mrs. Pratt and Mrs. Booker were appointed delegates to the W. Y. convention at Calgary in February.

WEEKLY JOKE

"Please sir, can I have a nickel's worth of nuts?"
"Certainly sonny. Would you like them mixed or is there some particular kind you prefer?"
"I'll have them mixed, please—and not too many coconuts."

Eastern Star Install Officers

St. Hilda's Chapter, O.E.S., held an open installation on Tuesday when there was a large attendance of members and visitors.

Mrs. W. S. Durrer, as installing officers and Mrs. J. Topley as marshal, installed the officers in a very efficient manner.

The following officers were installed.

W. Matron Mrs. D. Edwards
W. Patron Mrs. C. J. Wrightson
A. Matron Mrs. McGhee
A. Patron Mrs. F. Ahlgren
Secretary Mrs. Evans
Treasurer Mrs. Morgan
Conductor Mrs. J. Topley
A. Conductor Mrs. J. McDougall
Chaplain Mrs. R. Lantz
Organist Mrs. Singsstead
Marshall Mrs. Topley
Ada Miss Alice Pearson
Ruth Mrs. H. Tighe
Esther Mrs. Fleury
Marcha Mrs. Stiebel
Electa Mrs. C. Bolton.

Mons Chapter Elect Officers

The Mons Chapter, I. O. D. E. met at the home of Mrs. A. G. Stander on Monday when the following officers were elected.

Hon. Regent Mrs. Keondrick
Regent Mrs. Hugel
1st Vice President Mrs. Keith
2nd Vice President Mrs. Ranton
Secretary Mrs. Lowery
Treasurer Mrs. Evans
Educational Sec. Mrs. C. R. Ford
Echoes Sec. Miss N. Wilson
Standard Bearer Mrs. Phillipson.
It was decided to send a cheque of \$25.00 on the donation to the Didsbury Hospital. A donation of \$10.00 was also made to the Boys Band.

The Bouspiel.

The weather tightened up enough Thursday last to allow the bouspiel to be renewed, and by the careful planning of the schedule committee the 'spiel was brought to a close on Saturday, with the exception of the final event in the Merchants' Competition, and it has been necessary to postpone this final on account of the unavoidable absence of one of the finalists.

Two Carstairs rinks reached the semi-finals in the Citizens' Competition, when Mills beat L. Liesemer, and Bert Fisher beat H. Stouffer, of Olds. Mills got the best of Fisher in the finals, putting L. Liesemer into 3rd place and Stouffer into 4th.

In reaching the semi-finals for the Merchants' event Stouffer, of Olds, beat McCloy; Stouffer beat Dr. Liesemer; Johnson beat Bercht, and Fisher beat Pitt. Stouffer and Fisher reached the finals by beating Johnson and McCloy. The finals in this event will probably be played at the end of this week.

The Consolation event was won by the D. Sinclair rink, who got the best of Purvis, Crossfield.

Personnels of Finalists' Rinks

Citizens' Event—

L. Mills, skip; W. Weber, J. Chrysler, A. Edmondson

Bert Fisher, skip; F. Kaufman, O. Carleton, G. A. Wallace.

Consolation Event—

D. Sinclair, skip; Cliff Bellamy, Howard Halliday, Billie Smith.

The rinks to play in the finals of the Merchants' Event are:

A. G. Stander, skip; Russell Bercht, Ed. Ranton, W. J. McCoy.

Bert Fisher, skip; F. Kaufman, O. Carleton, G. A. Wallace.

Excepting for the delay on account of the weather the bouspiel was pulled off very smoothly.

The visiting curlers expressed their appreciation of the welcome they had received and complimented the schedule committee on the splendid manner in which the competition had been conducted.

At Didsbury

Special Meeting E.V. Congregation

A special meeting of the congregation of the Evangelical Church was held in the Knox Church on Monday evening.

It was voted to build a new church to replace Zion church, destroyed by fire recently. Messrs. G. H. Liesemer, E. N. Boettger, W. E. Rieder, Wm. Rupp, Russell Bercht, W. W. Snyder, J. L. Tugley, J. V. Bercht,

H. M. Heiber, J. R. Cunningham, M. B. Clemens, John Deadrick, H. J. Wood, and a representative of the Evangelical Ladies Aid Society were appointed a building committee to draw up plans and submit estimates. It is hoped the committee will be ready to commence work in the spring.

NOTICE

of ANNUAL MEETING.

PUBLIC NOTICE is hereby given that a Meeting of the Electors of the Town of Didsbury will be held in the High School Building, Didsbury, on Friday, the 26th day of January, 1934, at 8 o'clock p.m. for the purpose of receiving the auditor's report of the finances of the Town up to the preceding 31st day of December, and for the purpose of receiving the reports of the chairmen of the various committees of the Council.

The Annual Meeting of Didsbury School District No. 652 will be held immediately after the town meeting, for the purpose of receiving the auditor's report of the finances of the school district, and other business.

DATED at Didsbury, Alberta, this 17th day of January, 1934.

W. A. Austin, Sec.-Treas.

Town Council.

A meeting of the town council was held Monday evening in the High School, with Mayor Chambers in the chair.

A bylaw was approved appointing the secretary, Mr. W. A. Austin, as returning officer for the forthcoming election of town councillors and school trustees which will be held in February.

The question of added fire protection was the main subject of discussion during the evening, and a plan is being prepared to lay before the annual meeting to be held Friday, January 26th.

Passing of bills constituted the only other business transacted.

Didsbury U.F.A. Annual Meeting

The annual meeting of Didsbury local U.F.A. was held on Friday last when there was a large attendance.

Mr. Roy McNaughton was re-elected President for the third term; Mr. R. Eubank was elected Vice-President and Mr. Walter Scheidt Secretary-Treasurer.

Directors elected were Messrs. N. Swain, W. Irvine, John Clark, Amos Weber, and Frank Jackson.

Mr. W. Scheidt was appointed delegate to attend the U.F.A. convention which is being held in Edmonton this week.

Quite a lot of interest is being shown in the activities of the association and 31 members have already enrolled for 1934. Teams were chosen to canvas the district for members and it is expected to bring the membership up to at least 100.

BIRTHS

Born—Wednesday, Jan. 17th, to Mr. and Mrs. Glen Fulkert a daughter.

Thanks, Folk!

Having severed my connection with Builders' Hardware Stores Limited, I wish to take this opportunity of thanking you all for the wonderful support and patronage given me and bespeak for Mr. Barney Klassen a continuance of same. Both the "Firm" and myself feel that we've "Did something" towards helping the district through stressing times, and you have certainly done your part, with your support and patronage, without which it would have been impossible for us to carry on.

Mr. Barney Klassen is now in charge, and to those of you who have not had the pleasure of meeting him, we say, DO SO. We believe it will be to your benefit, both from a business standpoint and for friendship's sake.

Barney is a thoroughly experienced hardware man, and the policies of the firm will continue along the same line as previously adopted, which policies are "Better Service and Better Buys."

Again I say THANK YOU ALL.

Harvey C. Speelman.

Britain Shows The Way

When one reads of the very little accomplished by the World Economic Conference, and of the adjournment of the World Disarmament Conference without any results having been achieved, and coupled with the failures to advance the cause of peace, official announcement is made of re-armament in Germany, of the largest military and naval budgets yet known in Japan of a great programme of cruisers construction by the United States, of hundreds of millions spent on fortifications by France, one is inclined to ask: Are the nations of the world determined on self-destruction, and is it their desire that civilization as we now know it shall be destroyed?

When we recall the efforts made following the Great War to set up the League of Nations as a form of international machinery to maintain and promote the peace of the world; as we recall the fact that in the years since 1918 the League has, on more than one occasion, been instrumental in preventing war, but that more recently it failed to check Japanese aggression in China and Manchuria, as we witness Japan's defiance of the League and withdrawal from it, followed by the withdrawal of Germany, and now the threatened resignation of Italy, we are further inclined to ask: Is there no nation that can and will give leadership to the world in the cause of peace?

Is physical disarmament the first and necessary step to an assurance of peace? If so, then Great Britain has provided leadership, but, alas the other nations have refused to follow.

Speaking in the House of Lords recently, Lord Londonderry, Secretary for Air in the National Government, stated that Britain has only 850 first class airplanes compared with 1,650 in France, from 1,400 to 1,500 in Russia, 1,000 to 1,100 in the United States, and 1,000 to 1,100 in Italy. Britain's first class aircraft have been reduced to little more than 20 per cent of her post-war strength with the result that Britain now stands in the number of her military and naval airplanes only fifth in the list of nations.

Sir John Simon, Foreign Secretary of Britain, in a recent review of Britain's efforts to set an example in disarmament, stated in emphatic terms that Britain has set an example, has led the way. "No reasonable or instructed person can possibly suggest," said Sir John, "that we have not reduced our own armaments to the lowest point to which we could go by unilateral action. It will not be thought a waste of time if I gave the House three or four figures."

Of the British Navy, Sir John Simon then said:

"Take the Navy—I am going to give comparisons with the end of the war when we had piled up enormous forces; I am going to the year in which the war began."

"Since 1911 the capital ships of the British Commonwealth have been reduced from 69 to 15; its cruisers from 108 to 53; its destroyers from 216 to 152, and its submarines from 74 to 59. In 1914 we had a class of vessel called a torpedo boat, of which there were 106 in commission in 1914. They have disappeared entirely. At the same time there has been a reduction in personnel, as compared with 1914, from 152,000 to 90,000."

So much for leadership in naval disarmament given by Britain. Sir John Simon continued: "Take the Army—Since 1914, the regular Army has been reduced from 258,996 to 205,534. This has been effected by disbanding nine regiments of cavalry, 61 batteries and companies of artillery, 21 companies of Royal Engineers, and 21 battalions of infantry and three battalions of Colonial troops. At the same time the Special Reserve has been reduced from 80,120 in 1914 to 24,000, and there has been a reduction in the Territorial Army during this period of 141,702. In 1914 it was 312,000; today it is 176,000. In addition, during the same period, 18 regiments of cavalry, 31 battalions of infantry and seven battalions of pioneers have been disbanded by the Indian Army. That has resulted in an approximate reduction of 17,000 men."

Instead of following this wonderful leadership by Great Britain in disarmament, the other great nations of the world have actually increased their fighting forces and voted larger armament budgets than ever before in times of peace. If disarmament fails the British Commonwealth cannot be held in any sense responsible or blame-worthy. Britain has done its part; the world has refused to follow the British example.

As a result, the world today is drifting, if indeed, it is not actually rushing, into war. And the question arises, and calls for an answer, whether Britain's action in so largely disarming was, after all, the right way to encourage and induce disarmament by others? In fact, may it not be that in Britain's action to so sharply reducing her own armaments, other nations saw an opportunity to secure for themselves greater power, an opportunity to outstep certain national ambitions and, if necessary, defy others?

The failure of other nations to follow Britain's lead in disarmament only serves to prove what has been stated in this column on previous occasions, i.e., that physical disarmament by the nations is not good enough; it is not a sufficient guarantee of peace; in fact, it followed by some nations and not by all it may even encourage war. What is necessary, what in fact must precede physical disarmament, is a mental and spiritual disarmament by the people themselves. They must free themselves of their narrow nationalistic ideas, their suspicions of other peoples and nations, their racial and religious passions and prejudices. These are the things that cause war, and as long as people entertain and cherish such thoughts and ideas, and as long as other people, whether of the same or of different races, religions, classes, or self-interests of any kind who play upon and pander to the passions of people, continue to use them to inflame the masses, just so long will there be war.

This mental and spiritual disarmament among the peoples of the world must come first, until it does come there will be little headway made in the matter of physical disarmament. Without the former, the latter form of disarmament would be vain in any event. By her action, Britain has demonstrated that her people are ready for this larger, better, more far-reaching disarmament for the betterment of mankind. She cannot do more than maintain the force of her example and promote her educational propaganda. It remains for the rest of the nations to follow Britain's example.

Thousands Of Sheep In Drive

Twenty-five thousand sheep were gathered recently in the biggest drive of the Welsh mountains. They came from the entire Migneint mountain range of North Wales, combining Chamber of Commerce recently called three counties. The sheep were assembled for the second annual dip of the season. During the day the entire range was alive with dogs, sheep and shepherds.

A Moving Mountain

An unruly mountain that shifts about over the landscape and occasionally spouts great clouds of smoke skyward has its value. The Durango Chamber of Commerce recently called it a "moving mountain." It is a mountain of smoke that has been attracted to this region in the past three months by a desire to see Carleton Mountain. Durango's "moving peak."

Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. It is a wonder she becomes nervous and irritable, has lost sleep, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Using Infra-Red Rays

Newly-Discovered Process Takes Photographs Up To 300 Miles

Infra-red photography and its use in the detection of crime, as well as in medicine and dyestuffs research, formed the subject of a lecture by Sir Robert Robertson, chief government chemist, before a joint meeting of the Society of Chemical Industry and three other Manchester societies.

Sir Robert began by explaining the position of infra-red rays relative to other rays. The whole range of known rays runs from wireless rays, which may be as much as a mile long, to cosmic rays which are infinitesimally short, he said. The cosmic rays have such energy that they will pierce through the thickness of a metre of lead. This is due to the fact that the frequency of vibration of a ray increases as its wave-length decreases. The infra-red rays are next in length above the familiar spectrum of visible light.

Sir Robert referred to some of the better-known uses of infra-red rays. First in these was infra-red photography in which great advances have lately been made. The magnificent aerial photographs of the Everest expedition were one instance and in the United States landscape photographs are being taken up to a distance of 300 miles. Such photographs are made possible by the use of infra-red rays, which are not scattered as are ordinary light rays and can therefore pierce fog.

The lecturer referred to the medical uses of this photography, which is valuable in revealing skin conditions such as varicose veins, and to the research which has been attempted by scientists interested in dyestuffs. It is thought that the dyed cloths most suitable for wear in the tropics can be found by study of the extent to which different fabrics and dyes absorb the sun's rays. Sir Robert expressed the opinion, however, that research would have to go much farther from the visible spectrum before concrete results could be achieved in this field.

Battle Over Old Stamp

Collector's Wife Does Not Want Valuable Specimen Sold

A woman is now fighting a legal battle over a faded bit of paper worth £10,000, and in London a man is laying his plans to cross the Atlantic to secure it for himself.

The duellists are Mrs. Arthur Hind, widow of the Bradford-American silk millionaire, and Bela Sekula, of Lucerne, Switzerland.

The prize is a British Guiana 1858 one-cent stamp, the only specimen in existence.

Tails bit of paper, which is drab brown and black, and probably the ugliest stamp in the world, will be put up for auction, at which time, the man will be the keenest bidder for it.

But Mrs. Hind has brought a lawsuit to have it excluded from the sale of her late husband's world-famous collection, which is worth a million pounds, or, in other words, at least. Mrs. Hind wants to keep the £10,000 stamp as a precious memory of her husband, who died this year aged 7.

Still Using Old Custom

Horn Blowing Marks End Of Day In Ripon

Ever since Alfred the Great presented the quaint Old World City of Ripon, England, with a horn in token of its charter, it has been continuously used to herald the close of each day.

Picturesquely garbed in ancient costume, the official horn blower, on the exact stroke of 9 o'clock, parades the market square and sounds three loud clear notes which echo through the city.

It was in 880 that the Wakenham's horn was given to the city, and 700 years later an ordinance required the horn to be blown according to ancient custom at the four corners of the cross each evening. Later, three blasts are sounded outside the mayor's dwelling. The Horn is still worn by the Sergeant-at-Arms on all ceremonial occasions.

Bill—"The boss offered me an interest in the business today."

Joe—"Is that so?"

Bill—"Yes. He said that if I didn't take an interest in it pretty soon he'd fire me."

Delinite Improvement In Trade of Canada

BANK OF MONTREAL ANNUAL MEETING

Striking indications of the improvement that has occurred in world trade, as well as of the steady gain in many industries in Canada, were among the outstanding features of the address submitted at the annual meeting of the Bank of Montreal, Sir Charles Gordon, the president, in his address to the shareholders, stated that practically the world over trade was better than a year ago, and that in Canada, for the better part of the year, definite improvement in business had been going on. Canada's external commerce had also grown in volume.

Sir Charles also had a cheerful word regarding improved conditions in Great Britain. The country's faith in simple, well proved methods had once more been justified, with the result that Britain's credit stood as high as ever, and London had regained her position as the financial centre of the world.

In regard to the question of establishing a central bank in Canada, Sir Charles pointed out that two members of the Royal Commission were Canadians thoroughly versed in the banking and economic conditions of this country. These two members are in accord with the rest of the Commission in their findings. He drew attention to the cost of operating such an institution and the probability that the bank would always be under the control of a political party and thereby subject to political influences. The history of the

Federal Reserve and the Reconstruction Finance Corporation in the United States shows the little of elimination of political influence can be relied upon, he said.

Bank Is Strong Position
Mr. Jackson Dods, Joint General Manager, reviewing the annual statement of the bank, pointed out that of the total assets of \$78,500,000 the liquid assets aggregated \$492,500,000, or 71.15 per cent. of the liabilities to the public.

Of special interest was the announcement that the bank now has over one million deposits in Canada.

In summing up, Mr. Dods said: "Natural correctives are working toward world recovery, but many artificial barriers still impede progress. Economic and financial disruption have been brought about to no small extent by the operations of Central Banks under political influence, by excessive tariffs and quotas, by exaggerated nationalism bordering on ancient tribalism, the stoppage of free migration of peoples, distrust and selfishness, by imprudent use of the total resources of the part of citizens and their surrender of independence in many former democratic countries."

"In contrast, Canada is fortunately circumstanced in that it is a young country, with an abundance of natural gifts, with a hardy people, self-reliant and free of traditional hatreds, and with an inspiring past and a boundless future."

Boy Has Strange Talent

Can Play Tunes By Rubbing Palms Of Hands Together

A factor boy with musical heads showed city folk in Canada recently his strange talent in playing musical tunes by merely rubbing together his palms.

He discovered music in his hands while he was going home through the woods from grade school, he said. He had his hands in his overcoat pocket. As it was cold and there was no mittens, he took his hands out and began rubbing them together. He noticed when he noticed a squeaking sound. When he got home he kept experimenting and practicing until he could finally grind out "Yankee Doodle."

Ever since that time he has been trying to teach his friends in Traverse City, the town nearest his farm home, how to make music with their hands, but only a few notes can he get out of any of them.

"When the family get tired of hearing me, I would get up extra early, go down to the barn, and do the chores, and then sit and practice. I would go out in the woods and listen to the birds and the animals and try to imitate them with my hands."

He had said and said, "Bull frog," while with a twist and squeeze of his hands out came the croak of the amphibian. Quickly he changed to the sound of the chipmunk, the woodchuck, the call of a whistling, the sound of the whip-poorwill, the harsh cry of the bluejay, the chirp of a common sparrow—all by pressing his palms and fingers.

Heavy Cattle Shipments

Fifty Thousand Head Shipped From Canada To Britain This Year

Canada has shipped over 50,000 head of live cattle to the markets of the United Kingdom during the present year. This corresponds with only 10,000 head last year up to the same date.

Exports from Dec. 2 to Dec. 6 this year, totaled 1,263 head and brought the year's total up to 50,193 head.

The S.S. Concordia cattle ship to Glasgow, Scotland, sailed Dec. 19, and built 5.8 cents, live weight. Hickenhead sold the S.S. Manchester, commerce cattle. Light easterns made 13.7 to 14.2 cents in sink, and other grades sold accordingly. Light westerns 11.6 to 12.1 cents.

Cast-Iron Blocks For Roads

A new industry has been started in Oldham, England. The company is making cast-iron blocks for road surfacing and an experimental length is being laid at Moorside, Oldham. A quarter of an inch of bituminous solution and bonding material is laid between each block. The blocks weigh 25 pounds each, and are 14 1/2 inches square and 4 inches thick, studded, providing a non-slip surface. The design has been registered.

Tess—"You can't believe everything you hear."

Bess—"No, but you can repeat it."

Canada In Central Position

Cannot Ignore Problems Of Orient States Sir Robert Falconer

The importance of regional conferences as a means of solving differences and disputes among nations was emphasized by Sir Robert Falconer when he addressed the University Women's Club in Toronto, Canada. It must be remembered, was in the centre of the world, between the Atlantic and Pacific, and could not ignore problems of the Pacific. Canadians were not nearly so secure as they were inclined to think themselves. If the Orient were brought into agreement, America could not but suffer, Sir Robert said.

If China rose in the scale of civilization the world would rise socially, Sir Robert said. He emphasized the part which the new world had played in bringing about discontentment in the Orient. Steamers from the new world had brought their brilliant Japanese and Chinese students, and they had learned American customs and institutions and had gone home imbued with a new idea of life. The trouble in Manchukuo was only an incident on a tremendous background, he pointed out. He suggested that Japan was not likely to go to war with the United States. It was asking silk to that country. It was too important in her economic life.

He urged everyone to stand behind the League of Nations. War never solved any problem, only conferences, regional or world conferences, could really settle difficulties.

Luxury Flats In England

Block Will Contain Thirty Shops For Convenience Of Tenants

A block of luxury flats, which will occupy three acres of ground and contain 250 flats and 30 shops, is planned to be erected at Hamersmith, London, England. It is expected to be the largest single block of flats in Europe.

There will be a private automobile roadway running under one side of the flats, according to the architect's design, and tenants will be able to shop in comfort without going outside the building. Over 1,000 men will be employed on the building, which will cost, it is estimated, £500,000.

A man may dodge the earthly collectors, but he must pay the debt of nature as he goes.

National Marketing Board Would Facilitate Carrying Out Of London Wheat Agreement

"We believe establishment of a national marketing board would greatly facilitate the successful carrying out of the London wheat agreement," states a memorandum made public by the central board of the Canadian wheat pools.

Pointing out that all three pooling organizations had unanimously endorsed the principle of the agreement dealing with the wheat situation by international co-operative effort, it expressed doubt that the hedging system, "which has been kept from completely breaking down only by the stabilization policy of the federal government, could function at all under the risk of grain which would flood the market unless some policy of control over deliveries was established."

"With a quota system of deliveries from the farms established," the memorandum continues, "and a fixed export from Canada for a certain period, there would not be any place for speculation in marketing the grain, except at the expense of the producer or the consumer and our pool boards represent national co-operation and the futures trading system can get on very well together."

"The wheat agreement was drafted upon as in the interest of all people, consumers as well as producers, in the countries represented at the conference. If wheat producers are to assist in a regulated delivery of wheat to meet a quota of world consumption allocated to Canada, they must be assured of proper safeguards that will preclude the possibility of an increase in price of wheat being absorbed by interest situated between producer and consumer."

"They must also be assured of a market based on a negotiated price, and not on a speculative one where the price fluctuates widely from day to day and ten often bears no relation to the value of wheat."

Principle of a domestic price for wheat at a remunerative level to producers had been accepted by governments of nearly all important importing countries, and in force in one of the principal exporting countries, the memorandum said, adding: "We believe that a domestic price on a parity with prices of other goods sold in Canada should be set for all wheat processed for domestic use in this country."

The wheat pool boards believed successful carrying out of the wheat agreement should not be regarded as a cure-all for Canadian agriculture; but that it should be linked up with a national production and marketing policy for the entire farming industry, including livestock, poultry and dairy products as well as grain.

Belief was expressed that framing of an intelligently planned national policy for Canadian agriculture, devoting proper attention to marketing as well as production, was a task for governments and producers with the aid of departments of agriculture and agricultural colleges to undertake immediately. The need was urgent and such a policy should deal with agriculture on a broad basis, including measures for properly financing agricultural operations at reasonable interest rates; debt adjustment; and other steps to prevent depreciation of the farming plant.

"We consider that a definite fixed quota for the individual farmer, enforced by legislation, is the most equitable manner for adjusting wheat production in Canada to the quantity this country can deliver under the wheat agreement," it continues.

If adjustment of production to fixed demand were left entirely to the producer, reduction of acreage by one farmer might be offset by increased acreage by his neighbor. The farmer himself would decide how much land to sow to wheat when he knew definitely how many bushels he would be permitted to market.

Suburban "Yes, Sir," of all ours this is the one we feel confident and justified in pushing."

Customer: "That's enough! I want on to ride in."

W. N. U. 2025

Act Governs Child Labor

Egypt Follows Example Of Britain And Other Countries

The act which the Egyptian Parliament put upon the statute books to regulate the employment of children in industry follows the lines of acts with which the people of Great Britain and of other similarly advanced countries are familiar; but being the first of its kind in Egypt it naturally has been in many respects. In general children under 12 are not to work except in a few specified exceptional cases they may do so after nine years of age. The daily hours are not to exceed seven for those of the youngest class, while no young person under 15 is to work more than nine hours a day or to do any night work at all. Provisions are made for rest-times both daily and weekly and against danger and ill-health likely to arise in the various occupations. The act came into operation on the first day after Christmas—a happy augury perhaps for the introduction of a Children's Charter in Egypt.—*Egyptian Gazette.*

By Ruth Rogers

CAPELET SHOULDERS ARE SO SHARP! A LOVELY STYLE FOR SCHOOLGIRL.

Mother is wearing such adorable woolen this season. Wouldn't little sweetie girl daughter love it, too? This charming model sketched as carried out in pagoda-lined navy woolen. Note how Paris has played the tiny shoulder capes. Brown accents in the velvetton how finishing the neck, button trim and leather belt are very effective. Plaided woolens, checked or minotone wool jersey, wool cape, and wool and synthetic novelties would look equally smart, too.

It's so easily made and at small outlay.

Style No. 354 is designed in sizes 10, 12, 14 and 16 years.
Size 12 requires 2 1/2 yards of 36-inch material, 3/4 yard of 4-inch ribbon for bow. Leather belt.
Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Birds Not Forecasters

Seek Best Food And Shelter Regardless Of Weather

Birds are no better weather prophets than humans, according to V. C. Wynne Edwards, ornithologist at McGill University. They seek food and shelter just as human beings do, and always go where these necessities are most abundant regardless of weather conditions.

The pine grosbeak, a native of Canada, which is a rose-colored bird somewhat similar to the robin but slightly smaller, usually spends its summers around the Hudson Bay and sub-Arctic regions. In winter it comes south to the latitude of Montreal. This year, however, it came south three weeks earlier than usual, but Prof. Edwards does not seem to think this had any bearing on the approach of winter. He attributes this early migration to a poor crop of seeds and berries in the northern districts.

Another bird which makes its annual migration to the south from the Arctic regions is the common Canadian goose. This bird generally winters along the Atlantic coast from the maritime provinces to the Gulf of Mexico. It lives chiefly on the roots of a seaweed, commonly known as "eel-grass." Some time ago it was discovered that this grass was being attacked and was gradually disappearing. The rapid disappearance of this bird-food is having a distinct effect on the migratory habits of the feathered folk and the government is carrying on an investigation as to the origin and nature of the bacteria which is causing so much disturbance.

Faceless Clocks Popular

Large Railway Stations In London Using New Type

Popularity of the new faceless clock in a railway station in London has caused the prediction that the type will shortly be used in all stations in England. The time is given by figures three feet tall. They are painted on endless moving slabs, changing each minute. These advertisements are on three belts, and each is spangled with large circular reflectors, so that the time, "12:30" or "8:40" for example, are easily read day or night. It can easily be read from all parts of the London station.

Many Horses In Sweden

Numbers Are Increasing Despite Advance Of Motors

Advance of motors in Sweden has not diminished the horse population for horses are actually gaining in numbers. In 1902 Sweden had 542,158 horses and twenty-five years later about 655,000, not including army horses and those in the city of Stockholm. The ancient trade of saddle and harness making has suffered considerably from the depression, but brighter tones are now discernible.

Show Supt. Proprietor: "Here comes a number drawn from indigenous herds which ranged the Brazenz and South-east Valleys. With the steady increase since recorded, the park is

EARL OF ATHLONE CONFERS DEGREE ON HIS WIFE

The University of London Foundation Day Presentation of Degrees by the Chancellor, Earl of Athlone, this year saw the unusual and happy event of the Chancellor presenting his own wife with a degree. Our picture shows the Earl conferring the honorary degree of a doctor of literature on his wife, Princess Alice. The Earl is a brother of Queen Mary.

Government Policy Adopted For Preservation Of Wild Life Is Meeting With Gratifying Success

Continuing the policy of re-stocking depleted areas with indigenous species of wild life from surplus herds the Department of the Interior recently shipped a number of caribou or elk from Buffalo National Park, Wainwright, Alberta, to Kamloops, British Columbia. This shipment, consisting of six males and twenty females, was made at the request of the government of British Columbia. The animals will be liberated in the country at the head of Adams Lake, an area eminently suited to the requirements of this species.

Canada's efforts to restore the elk to its former numbers throughout the Dominion form another important chapter in the history of wild life conservation. The outstanding success achieved in bringing back the buffalo, and the excellent work performed in the protection and propagation of the pronghorn antelope have attracted world-wide attention while the sanctuary given to other interesting species in Canada's great national parks has been the means of preserving for future generations much of the wild life resources of the country.

The worst of elk once ranged the North American continent, in millions, covering approximately the same range as the buffalo. The settlement of the prairies and the accompanying improvident slaughter, however, brought about a disastrous reduction in the numbers of this magnificent member of the deer family so that today only a few scattered herds of elk are found outside the national parks and other preserves provided for their protection.

The first step taken by the government of Canada for the preservation of the elk was in 1909, when a number of these animals were purchased from a resident of Manitoba and placed in Banff National Park. Two years later a small additional number was introduced. By 1910 there were 32 head in the Banff Park enclosure, but as far as could be ascertained, the species in its wild state had practically disappeared from the vicinity.

In 1917 and again in 1920 the United States Government generously offered numbers of surplus elk from Yellowstone Park, in Wyoming. These shipments totaling 457 head arrived in good condition at Banff and were released in suitable areas in the park. By 1923 elk appeared to be very numerous in Banff Park, and at the present time their numbers are estimated to be about 2,000.

During the spring of 1929 a herd of 88 animals was brought into Jasper National Park from Wyoming, and in 1923 the Superintendent of that park estimated that there were at least 800 in the vicinity, including a number drawn from indigenous herds which ranged the Brazenz and South-east Valleys. With the steady increase since recorded, the park is

now believed to contain several thousand head.

The nucleus of the Buffalo Park elk herd consisted of a few animals which, together with several antelope and deer, were found enclosed in the park in 1909, after the erection of the many miles of fence required for the reception of the herd of buffalo. In 1910 and 1911 additional small herds were introduced into the park. In their new surroundings where they were aided by rigid protection the elk increased in a gratifying manner. Buffalo National Park now contains more than 1,500 elk, in addition to some 5,500 bison, 2,500 mule deer and 100 moose.

One of the largest known herds of wild elk in Canada, numbering, it is believed, between two and three thousand, ranges the plains and woodlands of Riding Mountain National Park in Manitoba. Riding Mountain Park originally formed a part of the Riding Mountain Forest Reserve, and the elk now in the park no doubt owe their existence to the protection afforded them in these sanctuaries during the past quarter of a century.

A small outlet for the buffalo and elk surplus to the grazing capacity of Buffalo National Park is provided by the loan or gift to governments and zoological gardens of one or more of these species. Recent shipments of elk from this park to Ontario include a carload of twenty-five animals which were placed in the Pembroke Crown Game Reserve in November, 1932, and two carloads sent to the Dorrington Imperial Park lands in March, 1933. Latest reports indicates that these elk are thriving in their new surroundings.

Westerner Honored

Dr. Riddell Of Regina College Receives Recognition For Contribution To Science

W. A. Riddell, Ph.D., the head of the chemistry department, Regina College, has received the honor of being made a Fellow of the American Association for the Advancement of Science, Washington, D.C., is the association center.

Fellows of the association are chosen because of what they have accomplished in scientific research.

Dr. Riddell, who was elected without having been first a member, had the honor given to him for splendid performance in connection with his study of chemical reactions in the dry industry.

Dr. Riddell was born at Oakton, Man., and obtained his early education there, later securing his B.A. and B.S. degrees at the University of Manitoba.

Swearing In New Governor

Ceremony In Isle Of Man Is Very Impressive

In preparation for the swearing in of Sir Montague Butler as the new governor of the Isle of Man a new staff of log oak has been prepared. It is five feet six inches long, and richly carved by Manx craftsmen. Sir Montague will hold the staff in his hand in Castle Rushen, and swear to "truly and uprightly deal between our sovereign lord and king and his subjects within this isle, and as differently as between party and party, as the staff now standeth, so far as in me lyeth." The ceremony will be elaborate and impressive.

Leaves A Leaphole

Dr. Charles G. Abbott of the Smithsonian Institution reports the discovery that the weather all over the world repeats itself substantially every twenty-four years, and calculates that it is a fundamental chronological period in nature, and is not only to the year itself. What he adds that it will differ in day-by-day details thus, predicting in a sign that the astrologers may have started looking up the record in 1910.

In a series of tests to find out what color is scientifically best for traffic markings on pavement, it was found that white markers are the most efficient.

J. E. GOODER, Editor & Manager

Dairy Club Notes.

This week we shall continue with our notes regarding the dairy cow, and hope that the boys and girls of the club are saving the short articles from this paper, for as we have said, they will help us in the club work this coming season.

When one thinks of the quantities of hay, grain, bundles or ensilage that a cow consumes in a year, in addition to pasture, one is led to ask what becomes of the feed, or in other words, what does the cow do with all this feed? The experience of dairymen indicates the importance of providing an abundance of feeds of the right kind, and in a well-balanced ration. Cows must be fed according to their requirements, for a most profitable production.

What is the feed used for? A cow may use her feed for five main purposes: Growth, Maintenance, Production, Reproduction, Increase in weight. In discussing these the little book, "Dairy Beasts," has the following to say:

Growth: Since a cow does not reach maturity and full growth till she is from 1 to 2 years of age, she should be fed till this age is reached, with a view to promoting her growth, size and capacity. Hence part of the feed which she eats during that time is used to produce weight in flesh, tissue and bone.

Maintenance: Throughout her life the cow uses a certain portion of her feed to maintain herself, that is to repair waste tissue, to supply energy and to carry on the very life processes. Opinions vary very greatly as to how much of her feed is used for this purpose. Some put it as low as one-third of her feed, and some put it as high as two-thirds of the total feed she consumes. This simply means that it costs this quantity of her feed to maintain her body without gain or loss.

Production: The production of milk naturally requires nutrients or feed, besides or apart from that used to maintain body weight. It is true that during lactation, that is while the cow is milking, especially during the early stages a beast will draw on her store of body tissue, but we must remember that the normal weight of the cow must be restored, either late in the lactation period or when the cow dries, if her health, long life and continued production are to be maintained. Thus a considerable portion of the feed must go into production of milk, and if we expect lots of milk we must provide plenty of feed. The maximum amount of milk which a cow can produce is governed by the size and quality of her milk gland, but we should feed sufficient to keep her up to full capacity.

Reproduction: The cow's system requires a good deal of nutrition prior to the birth of the calf. It is essential that proper kinds of feed are provided.

Increase in Weight: A thin cow, with proper feed and in the right proportions, will gain in weight. There is a gain in lean meat, but the principal gain is in the way of fat, which is laid in among the strands of the lean meat. Thus quantities of feed have to be used to repair or replace weight that has been lost.

To carry on her various functions

in life and to meet the 5 requirements mentioned above a dairy cow needs VARIOUS kinds of feeds in varying proportions. These kinds of feed may be divided into 3 main classes based on their physical characteristics.

The first class is that of **Roughage**, which may be divided into two kinds:

- (a) Dry, such as hay, straw, bundles, etc.
- (b) Succulent or Juicy, such as roots, ensilage, beet-pulp, grass, etc.

It will be remembered that all the above may be classified as **Roughage**. Feeds of this nature are bulky and contain relatively large amounts of fibre, which is the stringy part of the plant and as a rule not very digestible. The main difference between (a) and (b), above, is that the feeds classified under (b) contain considerably more water or juice than those under (a).

The second class is known as **Concentrates**. These are the farm grains such as wheat, oats, barley, flax, etc., also mill products such as bran, shorts, etc.

Minerals constitute the third class. These are not feeds in the same sense as those mentioned above, but they are just as essential to the upkeep of the animal body and production of milk as are the feeds. It is a fact that the ordinary grains grown in Alberta do not contain a sufficient amount of mineral substances and this has led to the addition of mineral in the form of ground limestone to the grain ration for dairy cows. We may have more to say about mineral matter in a later set of notes.

We appreciate very much the kindness of the Editor in printing these notes for the club members, and we hope they look forward to receiving the club work each week.

W. J. Elliott, Club Instructor.

KNOX UNITED CHURCH NOTES

The Sacrament of the Lord's Supper will be observed after evening service on Sunday, January 21st.

The Anniversary celebrations will be held Sunday, January 28th and Tuesday, January 30th. On the latter date Rev. G. Dickson, D.D., of Calgary, will give his famed lecture, "The Sun & Side of Life." At the close refreshments will be served.

**Didsbury Seniors
Defeat Carstairs**

Outplaying their opponents at the Didsbury rink throughout three hectic periods of fast hockey the Didsbury Seniors defeated Carstairs 4-2 Monday night. The local line of Evans, Brusso and Buhr dominated the spotlight each time they were on the ice, while McCoy played a fine game in goal. For the visitors Boucock, L. Stuhl and Chrystal were the big noises. Ross, the ex-Edmonton Varsity goalie had a bad night, as two of the goals that evaded him were shot from outside the blue line and were not seen by the goalie.

Didsbury started the firework when Evans scored on an assist from Brusso. Geiger put the locals two up on a long shot to the upper corner of the net. On a pretty play Boucock beat McCoy, and with Berscht serving a minute in the cooler, P. Stuhl tied the score. Carstairs missed a cinch goal when with three men ahead and the goalie out of his net Chrystal shot the rubber over the hemp.

Moyle broke the tie in the middle session and Didsbury went two up when Brusso scored after Buhr had shot high with no one but Ross to beat.

The final canto brought out some fast hockey, with the visitors pressing for a goal, but McCoy rose to brilliant heights and kicked out the rubber from all angles.

It was a clean game with but 3 penalties handed out to each team. Carstairs: Brusso, L. Stuhl and Chrystal; Sheriff, C. Stuhl, P. Stuhl, Boucock, Pearson, Johnson, Morgan. Didsbury: McCoy; Moyle and Hardy; F. Evans, Buhr, Brusso, Currie, Raymond, Berscht, White, Geiger.

1st Period, Didsbury: Evans from Brusso 1; Geiger 2. Carstairs: Boucock 3; Carstairs: P. Stuhl 4.

Penalties: L. Stuhl, Berscht. 2nd Period, Didsbury: Moyle 5; Brusso 6.

3rd Period Penalties: Hardy and Boucock.

Referee: Al Russell.

**Carstairs Juniors
Defeat Didsbury**

Carstairs Juniors defeated Didsbury 2-1 on Didsbury ice Friday night in a hard-fought game that featured brilliant work by the opposing goalies, a strong defence by the visitors and fine work by Didsbury's old line of Cunningham, Shannon and Bellamy, players all under 15 years of age, who together are making a strong bid for junior company.

The game was close and fast, with Carstairs scoring the only tally of the initial period. Evans took a pass from Brusso in the middle frame to equalize, only to have Edmondson and Morgan combine to give the visitors the lead, Edmondson making sure of the shot that ended the scoring.

The final canto found the locals playing five men up in an effort to tie up the game, but the Carstairs defence was too solid and Johnson in the visitors net was right on for all shots that came his way.

Carstairs: Johnson; Erande and J. Edmondson; Curry, Morgan, Stuart, W. Edmondson, Beckner, Vanceamp and Stedling.

Didsbury: Holub; L. Jenkins, D. Jenkins, F. Evans, Brusso, Buhr, White, Cunningham, Shannon and Bellamy.

Referee: Bob Gooder.

Cards of Thanks

We wish to express our heartfelt thanks to the many friends and neighbors for their kindness and the expressions of sympathy shown us in our recent sad bereavement.

Mrs. Fred Iann and Family.

The Young People's Branch of the W.C.T.U. wish to thank all those who contributed to their Christmas Cheer Fund. With the funds contributed they were able to bring Cheer to 16 homes in town.

The Didsbury Hospital Board wishes to thank Mens Chapter, I.O.O.F., for donations to the hospital.

**Partridge Covey Visits
Hanna Newspaper Office**

That Hungarian partridge have flourished and multiplied at a rapid rate in this district is well known, but it is very seldom that one hears of a covey of these little gamebirds visiting the post-office or local newspaper.

On Saturday evening, however, a covey of more than 15 Hungarian partridge were noticed on the sidewalk in front of the Hanna post-office.

Watchers were able to advance within 50 yards of the birds before they moved, awaiting their way south in front of the Herald office and finally taking flight at the approach of pedestrians. At the present time several flocks are remaining within the town limits—Hanna Herald.

"One Way Out."

(With Apologies to Longfellow.)

By Lew Wigglesworth, Didsbury.

Under a blistering harvest sun
The Hungarian farmer stands.

His head contains no thought of fun
And calloused are his hands,

And muscles all so tired now
Were once like iron bands.

His hair is grey and also thin,
And gloomy is his pan;

With sticky sweat his shirt is wet;
He does the best he can.

Yet wishes he could hide his face—
For he owes most every man.

Week in, week out, both morn and night,
He does a lot of chores;

Full many hours by lantern-light
Both in and out of doors.

He spends at feeding, cleaning
burns.

And milking cows, of course,
And children coming home from

school.

And sizing up his fields,
Consider him a brainless fool

For doubling up his yields,
And say, "Just look at that—Oh

gee!

The world has got him by the neck;
A farmer I shall never be—

The city life for mine, by heck!

For years he's never been at church
And neither have his boys;

He's left religion in the lurch—
He cannot sense its joys.

The parson passes on his way:
"I'll call some other time!" thinks

he.

"When he has time to think and pray
And talk about eternity."

Toiling, ever toiling;
Backward each year he goes.

Each day is like the one before—
At night there's no repose.

Something always left undone,—
(Right here we'll pause and "just

suppose"')

In place of working overtime
Producing wheat and oats and

rye,

And mixing always with the grime,
Suppose, my friend, this plan you

try.

Lay off part time, and play for once,
You more respect will then com-

mand.

No more they'll label you a dunce,
Add to your stuff there'll be de-

mand.

Let half your milking-stock go dry,
Cut down on poultry, pork and

beef;

One half your land let idle lie,
And off will drop your load of

grief.

Expenses, too, will lower be—
Soon profits will commence to

soar.

Then you can sing in righteous glee,
With all your cares and worries

e'er.

Come, farmers all, let's do this

stunt!

No use for one to start about;
Against stone walls we must not

bunt.

With heads composed of hair and bone!
Then here's to Nineteen—thirty—

four

And this swell "cent production"

plan.

Who has it not been tried before?

Well, YOU explain it—if you can!

WORLD HAPPENINGS BRIEFLY TOLD

During the past season an increase of 15 liners and 1,662 passengers was recorded in arrivals from Europe and Newfoundland, as compared with last year's figures, according to Montreal harbor officials.

Rear-Admiral Richard E. Sord has sailed from New Zealand with his second expedition to the Antarctic, where a party of scientists and explorers will make a two-year study of the South Polar regions from their base at "Little America."

Discovery near Cumberland, Maryland, of a "Noah's Ark of the Ice Age," a cave with a representative collection of prehistoric animals that lived in North America over a period of 2,000,000 years, was announced by the Smithsonian Institution.

A scant time before he was to have sailed with his wife for Canton, China, where he had sent funds for building his home, Wong Cong, 71-year-old Chinese merchant, of Los Angeles, California, was found strangled to death in his apartment.

Justice Robert Smith of the Supreme Court of Canada is retiring, having reached the age of 75, the statutory limit for judges. He was appointed to the Supreme Court in 1927 after five years on the Ontario Superior Court bench.

Loren Guthrie is on the "breed standard." Finding the customary medium of interchange inconvenient, Harvey Hughes, local baker, swapped 100 loaves of bread for a horse owned by Charles Cronyn. Payment will be on the installment plan.

Dr. Philip Randolph Bann, D.D., appointed South African Trade Commissioner in Ottawa only last April, will return to the union to succeed W. Farwell as under-secretary for external affairs. It was announced he will be succeeded at Ottawa by D. H. Vial Meyer.

Suggestions for improving the curriculum of the civil kind in Canada were laid before Prime Minister R. B. Bennett by a delegation representing the Canadian Federation for the Blind and the Canadian National Institute for the Blind. Six details of the proposed new course were given.

For his contribution to the art of milling gold, James J. Denny, Schumacher, Ont., mining engineer and Queen's University graduate, was presented with a medal of pure platinum by the Canadian Institute of Mining and Metallurgy. The disc, it is said, with a diameter of three inches, has an intrinsic value of more than \$500.

Advanced Surgery

Transplantation Of Parts Of Organs From One Person To Another

Successful transplantation of parts of organs from one person to another was described by Dr. Harry B. Stone, assistant professor of surgery, at the Johns Hopkins hospital.

The announcement was made by the Baltimore Sun at attendance at the meeting was restricted to the members of the club, composed of distinguished physicians.

Surgery, it was explained, have for years been able to transplant skin from one part of the body to another on the same person but a transplantation of tissue from one person to another almost invariably resulted in death. The method described by Dr. Stone consisted of growing the tissue for a time outside the body in a culture medium made from the blood serum of the prospective recipient of the transplant.

The tissue, by the method, becomes adapted to its future host. It was stated, and when finally implanted in him grows quite normally and survives for an indefinite time. Only a few cells from the healthy plant are used, it was said, and in the normal persons the missing tissue is readily replaced.

Pilots Showed Skill

When two military planes met head-on above Swarthope Aerodrome at Pretoria, South Africa, recently they became involved in a race, and each the two pilots manoeuvred their craft and brought them, still locked, to earth. One pilot was Captain Hector Brand, an experienced flyer, and the other was a young cadet.

ALICE IN WONDERLAND ESSEMBLE FOR KINDERGARTEN AND SCHOOL AGE

Frocking school uniforms becomes more interesting with the fall term. Smart little maidens besides being suitably and practically become necessary to small daughters. It makes her happy to feel she is smartly dressed, which helps tremendously with her school work.

Today's pattern—Alice in Wonderland dress and apron—is a real favorite. Daughter will be thrilled to wear it.

In red and white checked gingham with white lawn apron was the model carried out, but of course dozens of other schemes and colors are possible.

"I'm sure you will want to make it as soon as you get the pattern. And it will cost so little."

Style No. 422 is designed for sizes 4, 6, 8 and 10 years. Size 8 requires 2 1/2 yards 35-inch for dress with 1 1/2 yards 45-inch for apron and collar.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Gargoyles Being Replaced

Old Figures On British Houses Of Parliament Served Their Time

Several well-known figures of the British Houses of Parliament, who have found Big Ben striking more than 50,000,000 "bells" during their long tenure of office have lost their seats.

They are the "gargoyles" which for more than 80 years have decorated the topmost part of parliament's great great clock. With nose, rope and pulleys they have been made to surrender their positions to newer figures.

They were, the masons said, not as sturdy as they had been. Smoke, fog, storms and the beams of Big Ben had left their mark, each year the gargoyle heads tilted to every one of 407,340 notes, and 1,160 times each leap year.

The new gargoyles which beg from the corners of the clock are part of a general decoration of the houses of parliament.

South Africa's revenue in the first four months of the present financial year was \$2,360,000 above the corresponding period of 1932.

Since Germany owes the League of Nations \$190,000, perhaps Mr. Hitler would like to burn the books of that organization, too.

Saskatchewan's Fire Clay

Used Exclusively For Locomotives On Both Railways

Saskatchewan's fire clays manufactured into locomotive wheels are used exclusively on the western lines of both the Canadian Pacific and the Canadian National Railways, according to information released by the industrial development branch of the department of railways, labor and industries.

Fire clay products alone, of all the clay products industries of the province, was the one phase of clay manufacturing that has continued to show activity during the present depression period.

Due to the cessation of all forms of building, the manufacture of brick and the for building purposes has practically stopped.

In 1932 refractory clay products, chiefly fire brick, fire clay blocks and shapes accounted for 77 per cent. of the total production of clay products which amounted to \$109,738. This is a drop from \$166,207 for the previous year.

Not so long ago, Saskatchewan imported from the United States practically its entire requirements of fire clay products. At present practically the entire demand is filled with the Saskatchewan product. — Regina Post.

High Cost Of Books

People Of Moderate Means Unable To Buy Them

A chronic complaint among book readers is the book prices are too high for the average purse. When the library acquires books for its collection, the usual return is that its cost is prohibitive to all except the wealthy.

There is some foundation to this complaint against the high cost of reading. Popular novels cost on the average \$2, and many are priced higher. Biographical and autobiographical works, of which the past five years have produced many worthy ones, range in price from \$3 for single volumes to \$10 and even \$25 when published in two or more volumes. The average price for other books is probably \$3.

If good books could be had for less money there is no doubt that more people of moderate means would have larger libraries. Under the prevailing market many poor but ardent book-lovers must exercise forbearance until the desired volumes make their inevitable way into the second-hand book stalls.

School Children Menaced

Cougars On Vancouver Island Cause Much Uneasiness

Stories of cougars menacing school children in the Alberni district of Vancouver Island were told at the meeting of the Vancouver and Gulf Islands district of the British Columbia Farmers' Institute.

In one instance, it was related, a mother heard a scream and ran out to find her child faced by a large cougar. In another a mother whose child walks two miles to school has to accompany her until she meets a truck which takes her the rest of the way. Another mother went to the school in the evening armed with a gun to bring her little daughter home.

Wolves were also reported to be increasing in numbers.

A resolution was passed recommending continuance of the present \$10 bounty on cougars.

Arctic Air Route

Stefansson Predicts R. Will Be Busy

Yukon, Stefansson, noted Arctic explorer, predicts that before 1942 one of the busiest routes to Kamour will be across the Arctic wastes.

Addressing University of Delaware students, he said the safest place for airplanes are the tropics and the Arctic and that the Arctic has the advantage of being the shortest air route across the Atlantic.

Because air is heaviest in the Arctic it will also be possible to carry still larger pay loads with less fuel he said.

Russet oranges, according to entomologists, owe their color to a tiny red mite that works on the orange skin but does not penetrate into the flesh.

DIRECTS ADVERTISING PROGRAM

RICHARD G. BLOMFELD

Vice-President, Bechams Pills (Canada) Limited, who recently arrived from England to direct the operations of the Company and its subsidiaries in Canada and the United States. A new aggressive Merchandising and Advertising program has just been announced by Mr. Blomfield.

Newspapers Backbone Of New Becham Advertising

This Famous Old Firm Launches New Merchandising Drive

Looking forward to steadily improving business conditions in Canada, Bechams Pills (Canada) Limited, the Canadian subsidiary of the famous Bechams interests in the Old Country, and one of the prominent local industries, is undergoing an extensive reorganization of plans and policies, according to Mr. Richard G. Blomfield, Vice President and General Manager of the Company's operations in Canada and the United States.

During a recent interview, Mr. Blomfield, who recently came to Niagara Falls from England, to take charge of sales and manufacturing activities here, stated that a new and energetic merchandising and advertising program would be launched at once. "Newspapers will be the backbone of the Bechams Advertising effort," said Mr. Blomfield.

The new selling program will cover the Company's various products, including Bechams' Pills, Yeast-Vit, Tonic Tablets, Geritol, Ointment, Veno's Cough Syrup, and Bechams' and Bechams' in convenient pastille form, which has been just recently introduced in this country.

"I am tremendously impressed with the possibilities of trade development in Canada," said Mr. Blomfield. "The history of Bechams' progress during its over 50 years of business activity in many parts of the world, has indicated the soundness of buying, promoting, and advertising to the buying and reading habits of the markets covered. It seems natural, therefore, that in our new plan for sales development in Canada, the Daily Newspaper should play a most important part, as it has in England and elsewhere."

"In manufacturing arrangements, now available in our new, larger plant, my Associates, Mr. Arthur M. Robertson, Mr. James Grayson, Mr. J. H. Gates and myself, are looking forward constantly to a decided upturn in trade during 1934."

Noted Hunter Dies

B.C. Pioneer Was Authority On Wild Life Of Canada

Pioneer of the British Columbia mining fields, "Grizzly" Dan McDonald, reputed killer of more than 100 grizzlies, is dead. He died at Vancouver, B.C., after a career of prospecting and hunting which finally brought him riches. He held an eighth interest in a \$100,000 mining property recently discovered at Hell's Roaring Creek in the Kamour district.

For 20 years "Grizzly" Dan had prospected and hunted in the Cranbrook district and previous to that he had searched for gold in California and the Yukon.

A noted author on wild life, known both in Canada and the United States, McDonald was one of the best shots in western Canada.

Electric Bell For Trucks

Every truck in France must carry a selenium cell and electric bell beginning with 1934. The cell is to be placed at the back of the truck, so that any motorist who wishes to pass it may signal to the driver. This he will do by turning on his headlights, and the light flashing on the cell will cause it to ring the electric bell placed near the truck driver's seat.

Idea Not Practical

British Government Not In Favor Of International Air Force

The British Government believes an international air force at the disposal of the League of Nations, as suggested by a certain school of disarmament thought, would be neither practical nor desirable.

Lord Londonderry, Secretary of State for Air, made this announcement during the disarmament debate in the House of Lords, and followed it up with the declaration Great Britain could not easily contemplate creation of the League of Nations as a "super-state."

The league was an instrument for peace, and it did not exist for abolition of war by war, the minister said. Furthermore, the league under such a system would require the full panoply of military equipment and sea, land and air forces, with a general staff.

What chance, he asked, would such a heterogeneous force stand against a single first-class power which bombed Geneva? Again, there were powerful nations today which are not members of the League. "We could not risk the League's defeat," he added.

Lord Londonderry spoke in reply to debates among whom Lord Allen urged scrapping of naval, military and air forces of the nations, substitution of an international "police force" and transfer of all civil aircraft to an international authority.

The secretary for air castigated what he called "deliberate fallaciousness" of his speech on air armaments a week ago. All he had said, he explained was in the absence of general air disarmament Great Britain could not, indefinitely postpone conclusion of the home air defence scheme formulated 10 years ago.

The scheme called for 52 squadrons, whereas Britain still had only 12 squadrons, many of which were merely skeleton groups.

Evolves New Fruit

Currant Cherry Has Been Produced By Gardener In England

A remarkable new fruit, which has been named the currant cherry, has been produced by an amateur gardener at Thirsk, England.

It is the outcome of five years' experimenting by Elijah Green, a local preacher, aged 72.

The currant cherry is a cross between the black currant and the cherry, and is said to have the flavor of the former and the juiciness of the latter at its best.

Housewives here who have made currant cherry jam say it is better than any other sort they have ever tasted.

The berries grow in bunches resembling medium sized grapes, and are a very blue color. They ripen in the same month as the gooseberry.

The bushes are being propagated by means of cuttings.

Was Chinese Detective

Chang Apana, Of Honolulu, Was Picture Show Character

Chang Apana, 64, Honolulu Chinese detective, has followed in death the man who made him famous. Chang was the "Charlie Chan" in novels of the late Earl Derr Biggers.

His death removed one of Honolulu's most picturesque characters. When the city was incorporated years ago, Chang joined the police force and served until retired in May, last year.

His detective feats attracted local attention of Biggers before he visited the islands and the novelist incorporated some of these in his first story about Hawaii, "The House Without A Key."

An Excellent Shot

An Irishman obtained a position at an observatory, and spent some time looking at the telescope.

A professor walked in, and started taking observations when a star fell. "Beggers! that was a fine shot!"

At top speed, a running hare is completely off the ground one-fourth of the time.

About 250 of the 1,000 clocks in the collection of King George are in Windsor Castle.

CHILDRENS COLDS

OCCASIONAL WIFE

By **EDNA ROBB WEBSTER**
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student, and Peter Anson, a struggling sculptor fall in love and marry secretly, deciding to live apart until the time Peter can establish himself. Camilla, the adopted daughter of wealthy parents, is not to inherit money when she comes of age. She is preparing herself for life with a course in commercial art, hoping to get a job to contribute to support herself. She has been making the rounds of the agencies, Peter, working in his studio on an idea for a figure with which he hopes to win a scholarship to study abroad, receives a call from a beautiful model, Sylvia Todd, who offers to work for almost nothing if he will employ her. He cannot afford a moment to promise to think it over, Peter discusses the matter of a model with Camilla and decides to employ Miss Todd. Together Camilla and Peter decide on the figure. They are at the height of their happiness. At home Sylvia Todd receives a mysterious phone call. Peter begins work on his piece for the exhibit and Camilla, at her father's summer home, is a bit discontented without him. Avis Werth, one of Camilla's friends, who is in love with Peter herself, suggests that she and Camilla and Peter Wayne drive into town to get Peter for a party.

(Now Go On With The Story.)

CHAPTER XXII

In spite of the humid closeness of the small room, Peter and Sylvia had worked on through the Saturday afternoon. "Do you mind?" he asked her seductively. "Boiling as it is, I feel like work. Just getting into the spirit of the thing, I guess."

"I'm with you, big boy, to the last hilt," his model encouraged. "You haven't too much time to finish, have you?"

"Think I can make it," he replied curtly, already absorbed.

Sylvia flexed her strained muscles and resumed her position. An hour of intense silence, broken only at intervals by the croaking sound of the revolving platform that supported the clay figure.

Finally, he smiled wearily and nodded. "Thanks a lot, Miss Todd. That's all," and left the room to afford her privacy for dressing. He paced the

hall, smoking and thinking. His right hand sank into his pocket and encountered a slim roll of banknotes. It reminded him that this was payday for Sylvia. Presently, she opened the door and stood on the threshold, waiting expectantly.

"I had just remembered what day it is," he smiled. "I know you hadn't forgotten—and don't you ever let me forget, either." He walked toward her, drawing the bill from his pocket and counting them.

"Just enough," he said, holding them out to her.

Sylvia looked up and met his eyes inquiringly. "Is that—all you have, Mr. Anson?"

Peter hesitated briefly, then managed a short laugh. "Why—what does it matter? I owe it to you, and you need it just as much as I do. Perhaps more."

"No, I don't. I didn't tell you, but I have another job, now. I'm posing for another National entry when I'm not working for you. I guess you know him—Gus Matson."

The name startled Peter. He had lost track of Gus since commencement. "Fresh, I know him. So he's trying for the scholarship, too?" he asked thoughtfully. "Never thought he was so ambitious. Well, good luck to him."

"He says that your entering just out everyone else's chance to win, in half."

Peter emitted a deprecating smile. "Oh, say, I guess not! He rather flatters me, doesn't he?"

"Yes, he admits you are clever, but he hates you, I can see that. I've wondered why."

Peter shrugged. "Oh, a little personal matter. But I settled that, and have nothing against Gus."

"You wouldn't hold a grudge or be jealous of anyone I think you're awfully wonderful, Peter," she said softly, and raised her blue eyes in shy adoration. They had stepped back into the room when they began to talk.

"Well, do for you," he told her pleasantly. "Here, take your money and run along, it's late."

"I don't want it. I'd much rather you'd spend it for dinner for both of us. You're dead tired, you need diversion, and you're handsome. So am I handsome. Why don't we make some whoopee together for a change?" he heard on his arm urged him gently.

"Sorry," he turned away. "I don't feel like whoopee. All I want is a cold shower and something cool to drink, then sleep."

"In this hot room? Don't be all. You won't be able to sleep in here until morning, if then, come on," she pleaded. "Don't you want me for company?"

"That might be pleasant, but I can't accept it."

"Another date?"

"No."

"Well then," impatiently.

"Please don't insist," he said kindly, "and here is your money."

"Well, if you're not the first iceberg I ever saw in July? Don't you ever thaw out and get away from your eternal work and study?"

"You very busy. Not much time for play," he apologized.

Sue thought, "if he knew what he had coming to him, he might be a little decent to me. But I'll give him another chance. He's worth it." She related with a smile and to the proffered money. "All right, zero weather. I hope you got caught in a blizzard. If you do, let me know. I'd like to get cooled off, too."

He grinned with friendly response and Sylvia dashed out of the room.

Peter dropped into a chair and surveyed his work of the day. A frown puckered his broad, smooth forehead, above which his bright hair was disordered and damp with perspiration. His great arms hung limply in repose along the chair arms. They had been held at a rigid tension for hours.

There was a sudden flurry at the open doorway and laughing voices entered up the stairs and thudded into the room. Camilla, cool and sparkling in white, led the others. "Hello, Peter," she greeted him casually. "We all came in for you, to join us at the club. It's stifling here, but it's lovely out on the beach. The whole crowd is there, and we want you with us." Her eyes confided that it was she who wanted him.

"Why—I," he hesitated. He had risen and was covering his work with a blue-silk "beach" cloth, like a man.

"Don't say you won't." Avis had

entered the room and added her insistence. "Well, kidnap you if you don't come with us willingly." She made a coquettish gesture, tugging at his arm as if she had more persuasive powers than Camilla.

"All right," he agreed. "But you'll have to wait ten minutes. I just quit work and I feel like I'd been in a Turkish bath. You'd better wait outside where it's cooler. Down in ten or less," he promised.

It was the first time he had consented to join Camilla's crowd since "he" were married, but he went reluctantly. As he finished with dressing, panic seized him. He was joining a group of pleasure seekers whose money flowed into their pockets as it flowed out, in a continuous stream; and he had less than a dollar in his pocket. Sylvia actually had taken the last dollar he had.

On Monday, he would be paid for some tutoring and later in the week was pay day for the summer class instructors at the museum, which were his two principal sources of income. Added together, they were little enough, but he managed frugally.

However, money next week was not new. He never could face the chagrin of going out to the club without a little money. His thoughts darted about frantically for a solution. He might suddenly forget illness and go along with them.

No, that would frighten Camilla, and they would insist upon calling a doctor. He might just change his mind, or suddenly recall another engagement.

He was dressing with rapid movements, picked up his watch to slip it over his hand—had an idea, and dropped it into his pocket, instead. Then he took it out again and looked at it. He might just make it. He dashed out, unlocked the door and ran down the stairs. Terry Wayne's chromium-tipped, bright green roadster awaited him in the paved court, with Camilla in the passenger seat beside Terry and Avis nonchalantly smoking in the rumble seat.

His voices rose and chattered when Peter appeared. He hesitated a moment, glanced at Camilla and then swung his long legs about with a ramble.

Terry touched the starter and the powerful motor roared with its impatient flooding of the carburetor.

Peter leaned forward, casually. "Would you mind stopping a minute at the circle intersection. I have an errand. I was just going out to do when you blew in. Much obliged if you will."

"Okay," said Terry. With three more guttural roars of the motor and a strident blast of horns, he had turned around and shot out of the court into the traffic of the avenue.

Cars rattled and purred all around them. Roadster tops were down, closed-car windows open. The breeze of motion through space tossed the short cropped hair of women and wrestled at the open collars of men's sport shirts. When traffic lights commanded a halt, their faces grew impatient with the delay and the increased temperature of still air; heat shimmered, visible waves from the pavements upon which the sun had poured relentlessly all day.

"Just where shall I stop?" Terry glanced the words back to Peter.

"Oh, anywhere you can park. Along here is all right." He made rapid calculations.

Terry swung into a vacant space beside the curb and stopped the motor.

"I won't be long," he promised them, but his eyes involuntarily focused upon Camilla.

There was a market somewhere near, he reflected as he strode along, "run through the next street."

He searched the entrances and found it, dodged inside. He walked through as fast as the milling crowds of Saturday shoppers permitted him, between stalls of heaped vegetables, brilliant displays of fruit, colorful cheeses. He swung through the back entrance and hesitated, then turned to the right, north for half a block, hastened through an alley, turned right and was out on the street again. Back another half block and he was on the avenue, a block away from the parked car in which Camilla and her friends awaited him. (To Be Continued.)

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

THE EYE BY F. M. CROWE
SIGHT SPECIALIST, CALGARY

This is the first of a series of twelve articles written by F. M. Crowe, well-known Optometrist of Calgary. No doubt many readers will find these articles not only extremely interesting but of exceptional educational value. The first three articles deal with the anatomy of the eye, describe the various parts and their uses. Other articles will follow each week describing in a general way in language easily understood; Far-

sightedness, Near-sightedness, Astigmatism, Old Age Sight, Cataract, conditions necessary for good and sound vision, and the importance of the chief cause of headaches and nervousness and general information regarding eye care and protection of the eyesight.

It would be advisable for readers to preserve the above splendid diagram of the Eye for reference which will be of much assistance in understanding this important subject.

NO.—SOME OF THE PARTS AND THEIR USES.

The Sclerotic is the first coat and is known as "The white of the eye." It is hard and almost opaque forming a protection to the rest of the eye. It comprises about six sixths of the posterior of the globe.

The Cornea completes the remaining one sixth of the first coat and is fitted into the Sclerotic somewhat like the crystal of a watch fits into its case. The Cornea is highly polished and transparent, permitting the rays of light to pass through it. It should be somewhat curved in all directions and if not so a condition known as Astigmatism exists, which will be explained fully in another article.

The Aqueous Chamber is situated behind the Cornea and is divided by the Iris into the Anterior and Posterior portions. The Aqueous is a clear, transparent, watery fluid, slightly saline.

The Iris or colored "curtain of the eye" corresponds to the diaphragm

in the camera, automatically admitting more or less light as occasion requires. It is a narrow circular band about one fifth of an inch wide with a hole, known as the pupil, in the center. The Iris is of many shades of colors in different individuals. Contrary to a popular idea, the color of the eyes has no relation to the "strength of the eyes." The pupil is merely a hole in the Iris and looks black because there is no light inside but when we light up the interior with the Ophthalmoscope the light pink color of the retina is seen with the arteries and veins running all directions. Around the inner margin of the Iris is a muscle which contracts in strong light thereby making the pupil smaller and preventing an excessive amount of light from affecting the sensitive retina. When we enter a darkened room which requires more light to see, the radiating muscles contract causing the pupil to be larger.

(To Be Continued Next Week)

I Have Written These Twelve Articles

that you may better understand various eye conditions. THE DANGER of neglect or wearing glasses NOT expressly made for YOUR eyes. Can a physician operate properly on a patient? Your EYE EXAMINATION is too important to wear glasses except after a SCIENTIFIC examination with modern instruments in an office arranged FOR THE PURPOSE and by an EXPERT whose skill has been acquired by experience in a "CLOSED EXAMINATION." It's our life's work.

No charge for examination. You receive under no obligation and complete glasses as low as \$5.00. Take no chances with your eyesight! IT DOES NOT PAY.

Little Helps For This Week

"There shall no evil befall thee,"—Psalm 91:30.

"Whoso hearkeneth unto Me shall dwell safely, and shall be quiet from fear of evil,"—Proverbs 1:33.

I ask not "take away this weight of care,"

No, for that live I pray that all can bear.

And for that faith that whatsoever befall

My goodness be good, and for my profit prove.

Since from my Father's hand most rich in love

And from His boundless hands it cometh all.

Be like the promontory against which the waves continually break.

It stands firm and tames the fury of the water around it. Unhappy am I because this thing has happened to me? Not so, but happy am I though this has happened to me because I continue firm.

From pain, neither crushed by the past or fearing the future. Will wait then which has happened present thee from being just magnanimous temperate, prudent, secure against inconsiderate opinions and falsest of memories.

On every occasion that leads thee to vexation to apply this principle: that this is not misfortune, but that to bear it nobly is good fortune.

The Philippines' worst plague has been stopped.

Timothy Crop Light

Report Shows Carry-Over From Last Year Was Small.

Very little carry-over of timothy from last year is reported. In Alberta there was almost a total failure of timothy seed production in the "drier" Creek area, the estimates of commercial supplies for the province being 250,000 pounds, mainly in the northern part of the province and the Peace River area. The estimates from British Columbia are 500,000 pounds of timothy, and 3,500 pounds of timothy and alkali mixed.

Mrs. Peter Johnston spent a few days last week with her parents Mr. and Mrs. Troyer, Didsbury.

Mr. L. Gale spent a few days this week with Mr. and Mrs. Peter Johnston.

Don't forget the dance at Melvin School Friday night, Jan. 19th. Admission 25c each.

30 Short Pale Examination Paper 10 cents each—Pioneer Office

Elkton Notes.

Mr. and Mrs. J. Bagshaw were visitors at the home of the latter's parents Mr. and Mrs. F. Byrt, on Thursday.

The hockey game Sunday afternoon, between the Little Red Deer Boys and Cremona, resulted in a win for the Red Deer boys 10 to 2.

The Red Cross Dance in the Elkton School was a huge success, with an unusually large crowd, \$30.00 was broct in for the Junior Red Cross Hospital. The next dance will be on Feb. 16th, 35c for gent's, ladies free, please bring cake.

Barbara Byrt entertained some of her school friends to a skating party on Saturday afternoon, a good time was had, Mrs. Byrt served a delicious lunch to the young guests before they departed for their homes.

The school meeting on Saturday afternoon resulted in Mr. M. Campbell being elected new trustee. Mr. J. Luft to fill out the year left vacant by the leaving of Mr. R. Blain from the district, and Mr. A. Hagg the other. The chairman will be elected at the first meeting.

We hear that Eric's isn't going so far west to visit on Sunday afternoon now.

Douglas Plan will be Discussed

The Citizenship committee of the Young People's Society of the Knox United Church are arranging for a discussion of the "Douglas Plan" which will be held in Knox Church this (Thursday) evening.

Two speakers from Calgary, Messrs. McGregor and Unwin, who are connected with the movement headed by Mr. Wm. Aberhart in the city, will lead the discussion.

A good many people in the district are interested in this subject and will no doubt take the advantage of attending the meeting. The public are invited to attend and a collection will be made to defray expenses.

Crossfield Talent will Present Play

The Crossfield United Church will present the well-known squelch-drama, "The Path Across the Hills," at the Didsbury Opera House next Thursday, January 25th, under the auspices of Didsbury U.F.A. Local.

The play was given in Crossfield on January 5 to a capacity audience and according to press reports it was very cleverly presented, all the actors being highly commended.

Forage-deceiving entertainment with lots of good, clean humor, you should see this play Thursday evening next.

Popular prices of admission are: Adults 25c and children 15c.

W. H. Ross Wins Calgary By-Election

W. Harry Ross, Liberal candidate, won the Calgary by-election for the Alberta legislature held on Monday, with Miss Angela Turner, C.C.F. a close second.

C. F. Jamieson, people's candidate and E. H. Starr, Progressive Labor, were third and fourth respectively, both losing their election deposits.

The first count gave Ross 8665; Turner 8455; Jamieson 4105 and Starr 1095.

A third count was necessary to establish an election, when Ross was found to have a majority of 951 over the quota necessary to elect.

Carstairs Win From Didsbury Devils 3-2

Carstairs Midgets took the Didsbury International Devils into camp here 3-2 Tuesday night.

Both teams opened fast, the first period being scoreless. In the second period G. Edmondson netted for Carstairs, while the third period saw R. Shantz bulge the hemp for the Devils.

In the fourth canto G. Edmondson banged in two for the visitors. In the last minute Sharm scored for Didsbury, the game ending 3-2 in favor of Carstairs.

Devils: M. Holub; L. Gabel, Clarke; R. Shantz, Ranton, Bellamy, C. Sharmon, G. Cathness.

Westcott Notes.

We are glad to hear that Dale Jacobsen is improving, but is still at the Red Cross Hospital in Calgary.

Miss Dorothy Tuggle is helping at the Didsbury Hospital for a while.

Mrs. Alfrey is visiting her sister, Mrs. Earle Kluck.

A few skating parties have been held at the Dog Pound. The ice is good and all report a good time.

A draw was made at the school Friday night, for a tray donated by Dale Jacobson, and the proceeds donated to the Red Cross. Mrs. R. Goetsen was the lucky ticket holder.

A very pleasant evening was spent at the home of Mr. and Mrs. Dagdeford on the occasion of Hestman's birthday. What was played, honors going to Violet Bode and Ed. Kluck. Mrs. John Folkman and Norman Tuggle winning the consolation. Lunch was served at the close.

Lost—Two Old Bay Geldings, branded No. 10 right thigh, to be taken from 1931 to 1493. Notify Moss Snyder, Phone 516, Carstairs, Reward, (31me)

LOCAL & GENERAL

Mr. Ed Shand, of Edmonton, was reviewing acquaintances in town on Tuesday.

Archie Boreo will hold a Community Sale early in February. List your articles with C. E. Fisher. (2)

Mr. Melvin Hugel left last week-end for Vancouver to take up his position in the Royal Bank there.

The Evangelical Church services will be held in the M. B. C. Church on Sunday morning. The sermon theme will be, "The Continuing Christ."

Mr. A. Moravch and a number of friends visited his son, who is in the Calgary hospital, on Tuesday. He reports that Sid is progressing favorably.

Curling Notes.

Nine rinks have entered the local draw for the Macdonald Brier Trophy and the winning rink will go to Calgary for the southern Alberta playoffs.

The rinks entered will be skipped by Messrs. Woodcock, B. H. Fisher, Cliff B. Hany, Jim Kirby, A. Bruso, Dave Edwards, Geo. Julien and J. V. Borch.

The first game will be played tonight (Thursday).

Friendly games with the Crossfield and Carstairs rinks have been played this week.

Tuesday evening three Crossfield rinks played against local rinks on Didsbury ice with the following results:

Crossfield	Didsbury
G. Williams 8	Berscht 9
J. Williams 6	Woodcock 20
McMillan 5	Julien 13
G. Williams 11	Bruso 5

Wednesday evening Carstairs and Didsbury broke even on Didsbury ice each winning two games:

McNaughton beat J. Johnson, Fisher beat W. Shantz, T. Johnson beat J. Johnson, W. G. Liesemer beat W. Weber. At Carstairs Jim Kirby and Ward Wyman also broke even, each winning and losing a game.

Burnside Notes.

Lone Pine W. L. met in the hall last Thursday afternoon with the president, Mrs. Bert. Dress, in the chair. It was decided to hold a Valentine Concert and dance on Feb. 16th. Mrs. N. Eickel read a splendid paper prepared by Mr. H. Lynch Stanton, on the Property rights of married women. The next meeting will be held in the hall on Feb. 14th.

There will be a picture show in Lone Pine Hall on Wednesday evening, Feb. 7.

Mr. Sam McAllister spent Sunday with Mr. and Mrs. N. Eickel.

Mr. and Mrs. Joe Clark and family spent Tuesday afternoon with Mr. and Mrs. A. E. Thompson.

There will be another dance in the Lone Pine Hall on Friday, Jan. 26, with the Moonlight Strutters furnishing the music.

Miss Dorothy Cippelley came up from Calgary on Monday, to visit her mother who is confined in the hospital.

A track load of young people from this district took in the dance at Community Hall on Monday night for Mr. and Mrs. Harry Costes.

Mr. and Mrs. N. Eickel, Robert and Harold Thompson spent a few days this week in Calgary.

Most Popular Cartoon.

"Three Little Pigs," the most popular cartoon that has ever been produced, will be one of the added attractions at the Opera House this Friday and Saturday. This cartoon is all in natural colors and has for a theme song, "Who's Afraid of the Big Bad Wolf?"

It has proved so popular that it has started on its fifth consecutive month at one theatre in New York. Another theatre in New York has played a French version for three consecutive months.

Bring the children to see this special feature.
